BEIJING STATISTICAL YEARBOOK

农业及农村经济

AGRICULTURE AND RURAL ECONOMY

简要说明

一、本章资料的主要内容

本章资料反映北京市农业生产和农村经济基本情况,主要包括农村基层组织情况、农村地区人口、从业人员、耕地、农林牧渔业产值及主要农产品生产情况、设施农业、农业观光园、民俗旅游、农村固定资产投资、乡镇企业情况、农村经济收入与分配情况等。

二、本章资料的统计范围

农林牧渔业统计范围包括辖区内全部农林牧渔业生产单位、非农行业单位附属的农林牧渔业生产活动单位以及农户的农业生产活动。军委系统的农林牧渔业生产(除军马外)也应包括在内,但不包括农业科学试验机构进行的农业生产。

1. 农业:指各种农作物的种植活动。包括谷物、豆类、薯类、棉花、油料、糖料、麻类、烟叶、蔬菜、食用菌及花卉盆景园艺产品、水果、坚果、饲料和香料作物、药材及其它作物的种植。

2. 林业:包括林木的栽培(不包括茶园、桑园和果园的栽培、管理和收获等活动)、木材和竹材的采运、林产品的采集。

3. 畜牧业:包括牲畜饲养和放牧、家禽饲养以及野生动物的捕猎和饲养。

4. 渔业:分为淡水养殖和海水养殖,包括水生动物和海藻类植物的养殖和捕捞。

农村社会经济统计范围包括所有乡镇辖区内的社会经济活动。

三、本章资料的数据来源

乡镇企业数据由北京市经济和信息化委员会提供。农村经济收入分配数据由北京市农村经济研究中心农村合作经济经营管理站提供,耕地数据由北京市规划和国土资源管理委员会提供,林业数据由北京市园林绿化局提供,水产品数据由北京市农业局提供,农村基层组织资料由北京市民政局提供。其余资料均由北京市统计局、国家统计局北京调查总队提供。

四、本章资料的调查方法和核算方法

根据农业生产特点,农林牧渔业总产值的核算采用“产品法”计算,即用产品产量乘以价格求出各种产品的产值,按产品产值类别分别汇总,计算出农林牧渔各业的产值,各业相加为农林牧渔业总产值。

(1)农业:包括谷物和其他作物,蔬菜、食用菌及花卉盆景园艺产品;水果、坚果、饲料、香料;中药材。

(2)林业:包括林木的培育和种植;木材、竹材采运;林产品的采集。

(3)牧业:包括除渔业养殖以外的一切动物饲养和放牧以及野生动物的捕猎和饲养。

(4)渔业:包括水生动物和海藻类植物的养殖和捕捞。

(5)服务业:产值等于农林牧渔服务业营业收入。

1958年及以后的林业产值中增加了村及村以下竹木采伐产值;牧业中取消了厩肥产值;副业中取消了农民自给性手工业产值;渔业中增加了海洋捕捞水产品产值。1980年及以后的农业总产值,在副业中增加了农民家庭兼营工业商品部分的产值。从1984年起村及村以下办工业产值划归工业。从1993年起,取消副业,将野生动物的捕猎划入畜牧业,野生植物采集和农民家庭兼营商品性工业划归农业。从2003年起按照新的《国民经济行业分类》标准取消了“其它农业”,将农林牧渔服务业产值纳入农林牧渔业总产值中;从农林牧渔业总产值中取消了“家庭兼营商品性工业”;将村以上木材和竹材的采运划入了林业;产值计算采用生产者价格,即生产者第一次出售农产品的价格。2004年国家统计局报表制度规定农林牧渔业总产值增加按可比价计算的产值及发展速度(计算方法:用现价产值的中类数据除以中类缩减指数求得各中类的可比价产值,各中类相加得大类的可比价产值,最后用大类数据相加得农业可比价总产值,可比价产值除以上年现价产值得发展速度)。从2005年起,取消了按1990年价格计算的农业产值。由于2006年农业普查后对农业生产历史数据进行了修订,新修订的农业产值数据只到大类,如果按大类缩减计算农业可比价总产值不符合国家报表制度要求,故2005年及以前年度没有按可比价计算的发展速度。2010年起,根据新的《统计用产品分类目录》将原林业产值中的核桃、栗子、白果、松子等干果产值调整至农业产值中,为同口径对比,将2009年年报数据也作了相应调整。

主要粮食播种面积数据通过卫星遥感测量方法取得,粮食产量数据通过抽样调查方法取得。农林牧渔业生产统计采取全面调查方法,村级起报。

五、本章中关于历史数据调整的问题

根据2006年第二次农业普查结果,北京市统计局、国家统计局北京调查总队按照国务院农普办要求,依照国际通用做法,已对1997—2005年的相关指标历史数据进行了修订。

Brief Introduction

I. Main Content

Statistics in this chapter show basic situation of agricultural production and rural economy in Beijing, mainly consisting of statistics for rural grass-root organizations, population and employment, arable land, output of agriculture, forestry, animal production and hunting, fishing, production of main agricultural products, facility agriculture, agricultural sightseeing gardens, folk-custom tourism, investment in fixed assets in rural areas, township enterprises, income and distribution of rural economy.

II. Scope of Statistics

Statistics on agriculture, forestry, animal production and hunting, fishing cover all related producing entities, producers affiliated to non-agricultural departments, as well as farmers' agricultural production activities. Production by the military commission system shall also be included (except for army horse breeding), but the production by scientific testing agencies is not included.

1. Agriculture: It refers to the growing of various agricultural crops, including grains, beans, potatoes, cotton, oil plants, sugar plants, fiber plants, tobacco leaves, vegetables, edible fungus, flower bonsai and gardening products, fruits, nuts, feedstuff, and spice crops, herbs, and other crops.

2. Forestry: It includes tree planting (except for the cultivation, management and harvest of tea gardens, mulberry fields, and orchards), the logging of timber and bamboo, and the collection of forestry products.

3. Animal production and hunting: It includes the breeding and grazing of livestock, poultry agriculture, as well as hunting and breeding of wildlife.

4. Fishing: It falls into two parts: freshwater agriculture and mariculture, including the cultivation and fishing for aquatic animals and algae.

Statistics for social and economic development in rural areas cover social and economic activities of all villages and towns within the jurisdiction.

III. Source of Statistics

Statistics on township enterprises were provided by Beijing Municipal Commission of Economy and Information Technology. Statistics on income distribution in rural economy were provided by the Operation and Management Station of Rural Cooperative Economy, Beijing Research Center for Rural Economy. Statistics on arable land were provided by Beijing Municipal Bureau of Land and Resources. Forestry statistics were provided by Beijing Municipal Bureau of Landscape and Forestry. Statistics on aquatic products were provided by Beijing Municipal Bureau of Agriculture. Statistics on rural basic organization were provided by Beijing Municipal Bureau of civil Affairs. All other statistics were provided by Beijing Municipal Bureau of Statistics and National Bureau of Statistics Survey Office in Beijing.

IV. Method for Survey and Counting

Based on agricultural production characteristics, the gross output value of agriculture, forestry, animal production and hunting, fishing was calculated by the "product approach"--that is to multiply production volume by the unit price, so as to get output value of each product, then sum it up by category, namely agriculture, forestry, animal production and hunting, fishing; and the sum total of these categories will be gross output value of the whole sector.

(1) Agriculture: including cereal and other crops; vegetables, edible mushrooms, flower bonsai and gardening products; fruits, nuts, beverage, spices, and herbs.

(2) Forestry: including the cultivation and planting of forest trees; logging of timber and bamboo; and collection of forestry products.

(3) Animal production and hunting: including the breeding and grazing of animals other than fish breeding, as well as hunting and breeding of wildlife.

(4) Fishing: including cultivation and catching of aquatic animals and seaweed plants.

(5) Service: the output value equals the operating income of services in support of agriculture, forestry, animal production and hunting, fishing.

Since 1958, output value of bamboo and timber logging by villages and units subordinated to villages has been included in the statistics of forestry; output value of barnyard manure has been excluded from animal production and hunting statistics; subsistence handicrafts has been excluded from sideline products output value; and the output value of aquatic products by marine fishing has been added to fishing. Since 1980, the output value of industrial commodities operated by rural households has been included in the output value of sideline products. Since 1984, industrial output value produced by villages and units subordinated to villages has been added in the sector of industry. In 1993, the group "sideline products" was cancelled; the hunting of wild animals has been classified as animal production and hunting, and the gathering of wild plants and commercial industrial businesses run by rural households have been included in agriculture. A new Standard for *Classification of National Economic Sectors* was introduced in 2003. According to the new classification, the group "other agricultural activities" was cancelled; the output value of services in support of agriculture, forestry, animal production and hunting, fishing is included in the gross output value of agriculture; the value of industrial output by households is excluded; output value of wood and bamboo logging is included in forestry statistics; the output value is calculated at the producer's price, namely the price at which producers sell their agricultural products for the first time; the 2004 Reporting System of National Bureau of Statistics states that, for

incremental gross output value of agriculture, forestry, animal production and hunting, fishing, the output value and growth rate shall be calculated at comparable prices (calculation method: use the output value of groups at present prices to divide the groups' deflator, so as to get the output value at comparable prices; then add up the groups' output value to get the whole division's output value at comparable prices; in the end, add up all divisions' output value to get the gross output value at comparable prices for agriculture sector and divide the output value at comparable prices by the output value at current prices in the previous year to get the growth rate). Since 2005, the practice of using prices of 1990 as reference numbers to calculate agricultural output value has been cancelled. As historical data of agricultural production were revised after the agricultural census in 2006, revised agricultural production output value figures were presented only in divisions; and it does not meet the requirements of national reporting system to calculate the gross agricultural output value at comparable prices by divisions' deflator. Therefore, there were no figures of

growth rate at comparable prices in and prior to 2005. Since 2010, the output value of nuts such as walnuts, chestnuts, ginkoes and pine nuts formerly included in forestry has been added in the output value of framing according to the new *Catalog on Statistical Product Classification*. In order to conduct same-caliber comparison, data in the 2009 annual report have also been adjusted accordingly.

Data on the sown area of major grain were collected by satellite remote sensing; data on grain yield were gathered through sampling survey; and the production figures on agriculture, forestry, animal production and hunting, fishing sectors were added up by complete survey, starting from the village level.

V. Adjustments to Historical Statistics

Based on results of the second agricultural census 2006, Beijing Municipal Bureau of Statistics and NBS Survey Office in Beijing revised related historical statistics during 1997-2005 as required by the Agricultural Census Office of the State Council and in accordance with the international practice.

11-1 农村基本情况(1978-2017年)
BASIC STATISTICS FOR RURAL AREAS (1978-2017)

年份 Year	乡政府 (个) Township Governments (unit)	镇政府 (个) Town Governments (unit)	村民 委员会 (个) Villagers' Committees (unit)	乡镇及行政村 常住户数 (万户) Number of Permanent Households in Towns and Administrative Villages (10000 households)	乡镇及行政村 常住人口 (万人) Permanent Population in Towns and Administrative Villages (10000 persons)	乡镇及行政村 从业人员 (万人) Employed Persons in Towns and Administrative Villages (10000 persons)
1978				91.9	382.1	165.3
1979				92.9	374.7	165.1
1980				95.0	374.3	167.4

2005	43	142	3953	142.2	381.8	184.0
2006	41	142	3957	143.6	501.6	316.9
2007	41	142	3955	176.9	510.0	313.4
2008	40	142	3951	189.8	547.4	321.3
2009	40	142	3950	203.8	572.5	338.7
2010	40	142	3943	216.0	589.4	347.8
2011	38	144	3941	212.4	574.8	338.3
2012	38	144	3940	215.2	582.5	341.7
2013	38	144	3938	221.9	599.5	353.5
2014	38	144	3937	225.2	606.9	357.0
2015	38	144	3936	221.4	593.5	348.0
2016	38	143	3941	232.6	612.6	385.9
2017	38	143	3920	216.7	566.6	352.2

注：1. 从业人员指标1998年以前为乡村劳动力。

2. 乡政府个数、镇政府个数、村民委员会个数由北京市民政局提供。

3. 2006年乡镇及行政村人口和从业人员为农业普查数据；2007年以后乡镇及行政村人口和从业人员为农业普查口径，包含居住半年以上外来人口。

4. 2006年乡镇及行政村户数为农业普查数据，为自然户口径；2007年以后为居住一年以上的户口径。

Note: a) Employed persons before 1998 were rural labor force.

b) Numbers of township governments, town governments, villagers' committees are provided by Beijing Municipal Bureau of Civil Affairs.

c) Population and employed persons in towns and administrative villages were agriculture census data in 2006.

Statistical range of agriculture census data have covered population and employed persons in towns and administrative villages since 2007 including migrant population residing for over 6 months.

d) Number of households in towns and administrative villages in 2006 was from agricultural census, using natural households as the caliber; since 2007, the caliber was changed into households residing for over a year.

11-2 农业生产条件(1978-2017年)
CONDITIONS FOR AGRICULTURAL PRODUCTION (1978-2017)

年份 Year	年末实有 耕地面积 (万公顷) Actual Area of Arable Land (year-end) (10000 hectares)	农业机械 总动力 (万千瓦) Total Power of Agricultural Machinery (10000 kW)	农村 用电量 (万千瓦小时) Rural Electricity Consumption (10000 kWh)	化肥 施用量 (万吨) Consumption of Chemical Fertilizers (10000 tons)
1978	42.9	189.4	58802	11.6
1979	42.7	212.2	63124	11.3
1980	42.6	234.6	76753	12.3
1981	42.5	244.8	91844	11.2
1982	42.4	242.2	96961	12.0

2016	338.1	145.2	52.2	122.7	9.2	-8.2	-9.9	
2017	308.3	129.8	58.8	101.4	9.6	-8.8	-6.9	

注: 1. 农林牧渔业总产值绝对数按现价计算。从2003年起执行国民经济行业分类标准 (GB/T 4754-2002), 农林牧渔业总产值中含农林牧渔服务业产值。

2. 2003年以后, 计算农林牧渔业总产值使用的价格从农产品综合平均价调整为农产品生产价格。

3. 2006年为与农业普查衔接的数据, 1997-2005年为历史修订数据(下表同)。

4. 2010年按照新的《统计用产品分类目录》, 将原归属林业产值的核桃、板栗等林产品调整至农业产值, 并对2009年数据作了调整(下表同)。

- Note: a) The absolute number of agricultural gross output value are calculated at current prices. Sectors in this table are classified in accordance with animal production and hunting, fishing the Standard for Classification of National Economic Sectors 2011 (GB/T 4754-2011). Gross output value of agriculture, forestry, animal production and hunting, fishing has included the output value of services for agriculture, forestry, animal production and hunting, fishing.
- b) After 2003, the prices used for calculating the output value of agriculture, forestry, animal production and hunting, fishing have been changed from comprehensive average price of agricultural products to production price of agricultural products.
- c) Figures for 2006 were from agricultural census, and figures in 1997-2005 were historically revised data(same as the following table).
- d) Output value of forestry productions such as walnuts and chestnuts was transferred to that of the agriculture sector in 2010 according to the new Catalog of Product Classification Used for Statistics. Figures of 2009 were adjusted accordingly(same as the following table).

11-5 主要农业产品产量(1978-2017年)

11-9 农业生产条件

PRODUCTIVE CONDITIONS OF AGRICULTURE

项 目	Item	2017	2016	2017年为 2016年% 2017 as % of 2016		
主要农业机械拥有量		Possession of Major Agricultural Machinery				
农业机械总动力	(万千瓦)	Total Power of Agricultural Machinery	(10000 kW)	133.5	144.4	92.5
大中型拖拉机	(混合台)	Large and Medium-sized Tractors	(unit)	6933	7286	95.2
小型拖拉机	(台)	Mini Tractors	(unit)	1360	1309	103.9
机引农具	(台)	Tractor-propelled Farm Tools	(unit)	11852	12418	95.4
机动喷雾器	(部)	Motorized Sprayers	(unit)	20504	19433	105.5
联合收割机	(台)	Combine Harvesters	(unit)	1489	1667	89.3
机动脱粒机	(台)	Motorized Shellers	(unit)	3884	3791	102.5
米面加工机	(台)	Processing Machines of Rice and Flour	(unit)	3346	3957	84.6
机动挤奶器	(台)	Motorized Milkers	(unit)	1578	1875	84.2
饲料粉碎机	(台)	Fodder Grinders	(unit)	2910	3702	78.6
农业机械作业面积		Operation Area of Agricultural Machinery				
机耕面积	(公顷)	Cultivated Area by Machinery	(hectare)	11043	10833	101.9
占全部耕地面积比重	(%)	Share in the Total Arable Land	(%)	93.9	90.3	104.0
机播面积	(公顷)	Sown Area by Machinery	(hectare)	59367	81444	72.9
占播种面积比重	(%)	Share in the Total Sown Area	(%)	96.4	94.7	101.8
机收面积	(公顷)	Harvest Area by Machinery	(hectare)	51393	72736	70.7
占收获面积比重	(%)	Share in the Total Harvest Area	(%)	79.0	81.9	96.5
农村用电量及小水电		Rural Electricity Consumption and Small Hydropower Stations				
农村用电量	(万千瓦小时)	Rural Electricity Consumption	(10000 kWh)	615078	547099	112.4
农田水利		Irrigation and Water Conservancy				
排灌用动力机械	(台)	Irrigation Machinery	(unit)	33367	35956	92.8
排灌用动力机械动力	(万千瓦)	Power of Irrigation Machinery	(10000 kW)	39.7	42.4	93.7
机(电)井	(眼)	Motor-pumped Wells	(unit)	32447	32586	99.6
#已配套	(眼)	Completed Sets	(unit)	30028	30645	98.0
固定机电排灌站	(处)	Drainage and Irrigation Stations with Fixed Machinery	(unit)	328	782	41.9
有效灌溉面积	(公顷)	Effective Irrigation Area	(hectare)	115480	128470	89.9
化肥施用量(折纯)		Consumption of Chemical Fertilizers (converted into net amount)				
化肥施用量	(吨)	Consumption of Chemical Fertilizers	(ton)	85493.7	96529.7	88.6
#氮肥	(吨)	Nitrogenous Fertilizers	(ton)	37993	43855	86.6
磷 肥	(吨)	Phosphate Fertilizers	(ton)	4663	5423	86.0
钾 肥	(吨)	Potash Fertilizers	(ton)	4388	5070	86.5

注：1. 农村小水电站是指乡村两级小水电站实有数。

2. 主要农业机械拥有量、农业机械作业面积、排灌动力机械数据由北京市农业局提供。

3. 机(电)井、固定机电排灌站及有效灌溉面积数据由北京市水务局提供。

Note: a) Figures of rural small hydropower stations refer to actual number of small hydropower stations at township and village level.

b) Figures of possession of major agricultural machinery, operation area of agricultural machinery and irrigation machinery are provided by Beijing Municipal Bureau of Agriculture.

c) Figures of motor-pumped wells and Drainage and Irrigation Stations with Fixed Machinery are provided by Beijing Water Authority.

11-21 双层经营主要指标情况(2017年)
MAIN INDICATORS OF DOUBLE-LAYER MANAGEMENT SYSTEM(2017)

项目		Item		2017
集体经济组织情况		Organizations of Collective Economy		
乡镇级集体经济组织数	(个)	Number of Township-level Collective Economic Organizations	(unit)	195
村级集体经济组织数	(个)	Number of Village-level Collective Economic Organizations	(unit)	3945
汇总农户数	(户)	Total Number of Peasant Households	(household)	1325646
汇总人口数	(人)	Total Number of Population	(person)	3106804
劳动力总人数	(人)	Total Number of Labor Force	(person)	1817938
就业率	(%)	Employment Rate	(%)	93
集体经济经营情况		Operation of Collective Economy		
集体经济总收入	(万元)	Gross Income of Collective Economy	(10000 yuan)	7236229.3
其中: 主营业务收入	(万元)	Of which: Main Business Income	(10000 yuan)	4987536.2
利润总额	(万元)	Total Profit	(10000 yuan)	433508.9
净利润	(万元)	Net Profit	(10000 yuan)	338282.7
可供分配的利润	(万元)	Profit Available for Distribution	(10000 yuan)	-161771.7
未分配利润	(万元)	Undistributed Profit	(10000 yuan)	-513983.3
资产总计	(万元)	Total Assets	(10000 yuan)	68795543.0
乡镇级	(万元)	Township Level	(10000 yuan)	24614781.2
村级	(万元)	Village Level	(10000 yuan)	44180761.8
所有者权益合计	(万元)	Total Owner's Equity	(10000 yuan)	23096341.5
乡镇级	(万元)	Township Level	(10000 yuan)	5606248.5
村级	(万元)	Village Level	(10000 yuan)	17490093.0
人均所有者权益	(元)	Per-capita Owner's Equity	(yuan)	74341
农户收入情况		Income of Peasant Households		
农户总收入	(万元)	Total Income	(10000 yuan)	13829868.7
农户所得总额	(万元)	Total Earnings	(10000 yuan)	7060982.1
人均所得	(元)	Per-capita Earnings	(yuan)	22727
农户从集体经济获取的所得总额	(万元)	Total Earnings of Peasant Household from Collective Economy	(10000 yuan)	1685141.6
农户经营休闲农业及乡村旅游收入	(万元)	Income of Peasant Household from Operating Leisure Agriculture and Rural Tourism	(10000 yuan)	107509.3

主要统计指标解释

农林牧渔业总产值 是以货币表现的农林牧渔业的全部产品总量和对农林牧渔业生产活动进行的各种支持性服务活动的价值。

耕地 指种植农作物的土地，包括熟地，新开发、复垦、整理地，休闲地（含轮歇地、轮作地）；以种植农作物（含蔬菜）为主，间有零星果树、桑树或其他树木的土地；平均每年能保证收获一季的已垦滩地和海涂。耕地中包括南方宽度<1.0米、北方宽度<小于2.0米固定的沟、渠、路和地坎（埂），临时种植药材、草皮、花卉、苗木等的耕地，以及其他临时改变用途的耕地。

农作物播种面积 指实际播种或移植有农作物的面积。凡是实际种植有农作物的面积，不论种植在耕地上还是种植在非耕地上，均包括在农作物播种面积中。在播种季节基本结束后，因遭灾而重新改种和补种的农作物面积，也包括在内。

设施农业 指以工厂化生产方式，建造人工设施，改变气候条件，提高农作物抵御自然灾害的能力，改良生物特性，使作物实现错季或反季节生产，达到农作物均衡生产的目的。

农业机械总动力 指主要用于农、林、牧、渔业的各种动力机械的动力总和。包括耕作机械、排灌机械、收获机械、农用运输机械、植物保护机械、牧业机械、渔业机械和其他农用机械[内燃机按引擎马力折成瓦（特）计算，电动机按功率折成瓦（特）计算]。不包括专门用于乡、镇、村、组办工业、基本建设、非农业运输、科学实验和教学等非农业生产方面用的动力机械与作业机械。

农村用电量 指本年度内，扣除在农村中的国有经济工业交通、基建等单位的用电量以后的农村生产和生活的全年用电总量（计量单位千瓦小时，按全年累计数统计），即包括国家电网供电，也包括农村自办电站供电量。

农用化肥施用量 指本年度内实际用于农业生产的化学肥料数量，包括氮肥、磷肥、钾肥和复合肥。施用量要求

按折纯量计算数量，即各类化学肥料的实际施用数量按其含氮、含五氧化二磷、含氧化钾的比例折成百分之百计算。

折纯量 = 实物量 × 某种化肥有效成份含量的百分比

乡镇及行政村单位常住户数 指长期（一年以上）居住在乡镇（不包括城关镇）行政管理区域内的住户，还包括居住在城关镇所辖行政村范围内的农村住户。户口不在本地而在本地居住一年及以上的住户也包括在本地农村住户内，有本地户口，但举家外出谋生一年以上的住户，无论是否保留承包耕地都不包括在本地农村住户范围内。不包括乡村地区内的国有经济的机关、团体、学校、企业、事业单位的集体户。

乡镇及行政村常住人口 指乡村地区常住居民户数中的常住人口数，即经常在家或在家居住6个月以上，而且经济和生活与本户连成一体的人口。外出从业人员在外居住时间虽然在6个月以上，但收入主要带回家中，经济与本户连为一体，仍视为家庭常住人口；在家居住，生活与本户连成一体的国家职工、退休人员也为家庭常住人口。但是现役军人、中专及以上（走读生除外）的在校学生、以及常年在外（不包括探亲、看病等）且已有稳定的职业与居住场所的外出从业人员，不应当作家庭常住人口。

乡镇及行政村从业人员 指全部乡镇及行政村人口中16岁以上实际参加生产经营活动并取得实物或货币收入的人员，既包括劳动年龄内经常参加劳动的人员，也包括超过劳动年龄但经常参加劳动的人员。但不包括户口在家的在外学生、现役军人和丧失劳动能力的人，也不包括待业人员和家务劳动者。从业人员按从事主业时间最长（时间相同按收入）分为农业从业人员，工业从业人员，建筑业从业人员，交通运输仓储及邮政业从业人员，信息传输、计算机服务和软件业，批发与零售业从业人员，住宿和餐饮业从业人员，其它从业人员。

双层经营 指农民家庭分散经营和集体统一经营相结合。

Explanatory Notes on Main Statistical Indicators

Gross Output Value of Agriculture, Forestry, Animal Production and Hunting, Fishing refers to the monetary value of all products of agriculture, forestry, animal production and hunting, fishing, as well as the monetary value of services provided in support of all the above-mentioned sectors.

Arable Land refers to the land suitable for growing crops, including cultivated land; any land newly opened up, reclaimed and cultivated; fallow land (including swidden and rotated land); land mostly for growing crops (including vegetables), supplemented by mulberry trees, fruit trees, and other trees; cultivated bottomland and shallows that can secure an average of one harvest annually. Arable land includes furrows, ditches, paths and field ridges less than 1m wide in the southern part of China, or less than 2m wide in the northern part. It also covers arable land that is temporarily for growing medicinal materials, turf, flowers, nursery stock and other uses.

Sown Area refers to the area of all lands actually sown or transplanted with crops, including both the cultivated and non-cultivated land. Area of lands re-planted after seedtime has passed due to natural disasters is also included.

Facility Agriculture means to produce in an industrialized manner, put in place facilities of manual intervention, change climate conditions, increase the crops' capability to resist natural disasters, and improve the crops' biological property, so as to stagger harvest seasons, create anti-season production, and achieve balanced production of crops.

Total Power of Agricultural Machinery refers to the total power of motive power machines used in agriculture, forestry, animal production and hunting, fishing sectors, including machinery for ploughing, irrigation and drainage, harvesting, agricultural transport, plant protection, animal production and hunting, fishing and other farm machinery (The horsepower of internal combustion engines is converted into watts, and the output of electric motors is also converted into watts). Motive power machines and operating machines exclusively used for non-agricultural production activities, such as industrial operations run by counties, towns, villages and teams, capital construction, non-agricultural transport, scientific experiments and teaching, are not included.

Rural Electricity Consumption refers to the total rural production and rural residents' electricity consumption in the whole year (unit of measurement: kilowatt-hour; the data representing accumulative usage of the year), deducting the consumption by entities like state-owned industry, transport, and infrastructure construction. The data cover both power supplies by the State Grid and by the rural self-run power stations.

Consumption of Chemical Fertilizers refers to the total quantity of chemical fertilizers applied in agricultural production within the year, including nitrogenous fertilizer,

phosphate fertilizer, potash fertilizer, and compound fertilizer. The amount of chemical fertilizers applied is calculated in terms of net amount, that is, to use the gross weight of the respective fertilizers in calculating the quantity of effective ingredients (e.g. nitrogen content in nitrogenous fertilizer, phosphorous pent oxide content in phosphate fertilizer, and potassium oxide content in potash fertilizer).

Net Amount = Physical Quantity × Content (%) of Effective Ingredients in Certain Chemical Fertilizer

Number of Resident Households in Towns and Administrative Villages refers to households living in the administrative areas of towns and villages (excluding township government premises) on a long-term basis (more than one year), including those living in administrative villages within township government premises. Households with non-local household registration but having been living locally for more than one year are also counted as local rural households; while households with local household registration but left to make a living elsewhere for more than one year, with or without contract lands, are not counted as local rural households. Collective households of state-owned organs, groups, schools, enterprises, and public institutions, as well as households living in grouped commercial residential quarters in rural areas are not included.

Permanent Population in Towns and Administrative Villages refers to the population of permanent households in rural areas, namely those who stay home regularly or live at home for more than 6 months with their economic life and livelihood incorporated into the household. Migrant workers who live away from home for more than 6 months but taking most of their earnings back home, with their economic life still incorporated into the household, are also counted as permanent population of the household; state employees and retirees who live locally with their life incorporated into the household are also considered permanent population. But soldiers in active service, enrolled students (externs excluded) in technical secondary schools or above, as well as migrant workers who lived away from home for years (excluding those who travel to visit their families or to seek medical care) with a stable job and residence elsewhere, are not regarded as permanent population.

Employ Persons in Towns and Administrative Villages refer to persons aged above 16 in all towns and administrative villages, who actually participate in productive and operating activities and earn incomes in kind or cash, including persons within the range of labor age and regularly participating in labor, and persons beyond the range of labor age but regularly participating in labor; while local registered students who left home for education, soldiers in active service, and people who lost the ability to work are not included, neither are the people
